

Boat Operations TECHNICIAN

*In Association with
Jefferson County Fire and Rescue Training Academy
This Course Exceeds the Requirements of NFPA 1006 (2013)
NFPA 1670 (2014) for Boat Operations Technician And
FEMA Boat Operator, Swiftwater/Flood SAR Tech., Waterborne SAR Team*

Classroom portion, students will be exposed to a number of topics including: A review of the rescue philosophy in swift water • The application of motorized boat in the dynamic swift water environment • The types of motorized boats that can be used in swift water • hydrology • Basics of boat handling

During the field portion of the course, students will be shown commonly used rescue boats, as well as gain experience reading the water and operating boats. Basic boat handling skills such as eddying out, peel outs, and ferrying will be practiced. Students will then apply the skills they have learned to up-run, down-run and perform rescue scenarios.
